

I am a FM Listener who is concerned about the LPFM expansion that would possibly cause me to lose local access to KLOVE.

K-Love serves my family on a daily basis as it is where we tune in to hear local and national news issues addressed. It is very kid friendly in that I never have to worry about what my almost three year old will hear and repeat to others. It is one of two stations that I tune in to at all on the radio. But I am not alone. I constantly see people with bumperstickers and hear longing calls from other listeners about how large an effect K-love is having in families and other individuals in my community. I believe that even the larger community as a whole needs an option available to them. The kind of programming that K-love offers is very hard to find. I know when I have people visiting from out of the area, they often comment they wish they had just such programming in their area. Please do not let the LPFM broadcasters change that. It is a service to the whole area, an uplifting and much needed light in my daily life. I even consider myself a safer driver because of its calming and positive programming. Thank you for your consideration.

Sincerely, Rachel Lambert- mother of two future Klove listeners!
